Brown 600 Series Cutters are designed to be rugged machines that can handle super heavy cutting. Brown 600 Cutters are perfect for Right Of Way maintenance and heavy brush shredding. The heavy construction is tough enough to cut heavy brush and trees up to four inches in diameter. Easy cutting adjustments allow cutting heights from two to twelve inches. The heavy construction and balanced blade carrier keeps vibration to a minimum and the closed rear maximizes mulching of the material. For added operator safety, we include a standard front chain curtain. Available options include, a rear chain curtain and 1000 RPM models.

## General Specifications
